

# Wireless Pet-immunity PIR Motion Sensor

Pet immunity

Low battery report

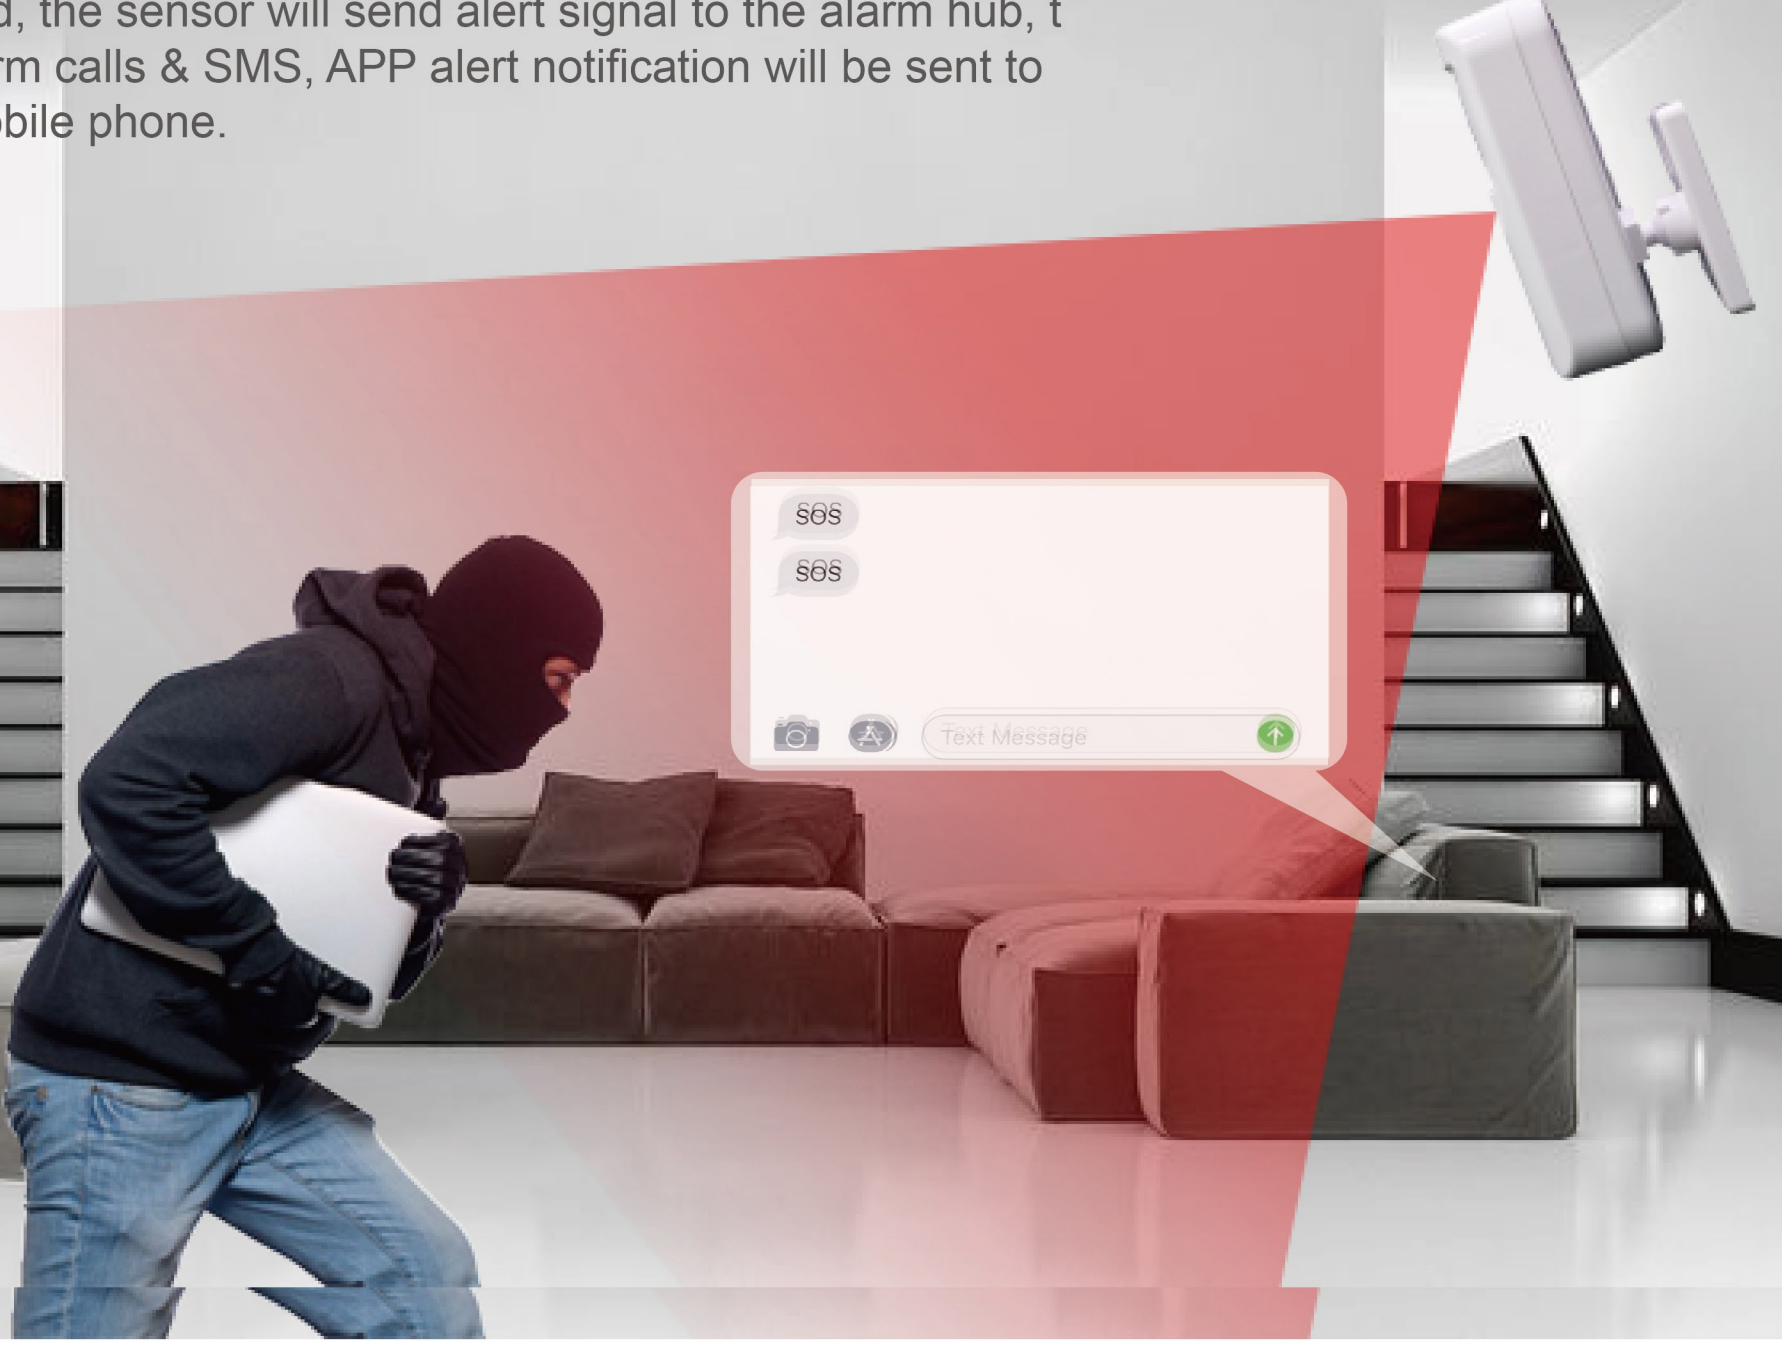

Wireless  
connection

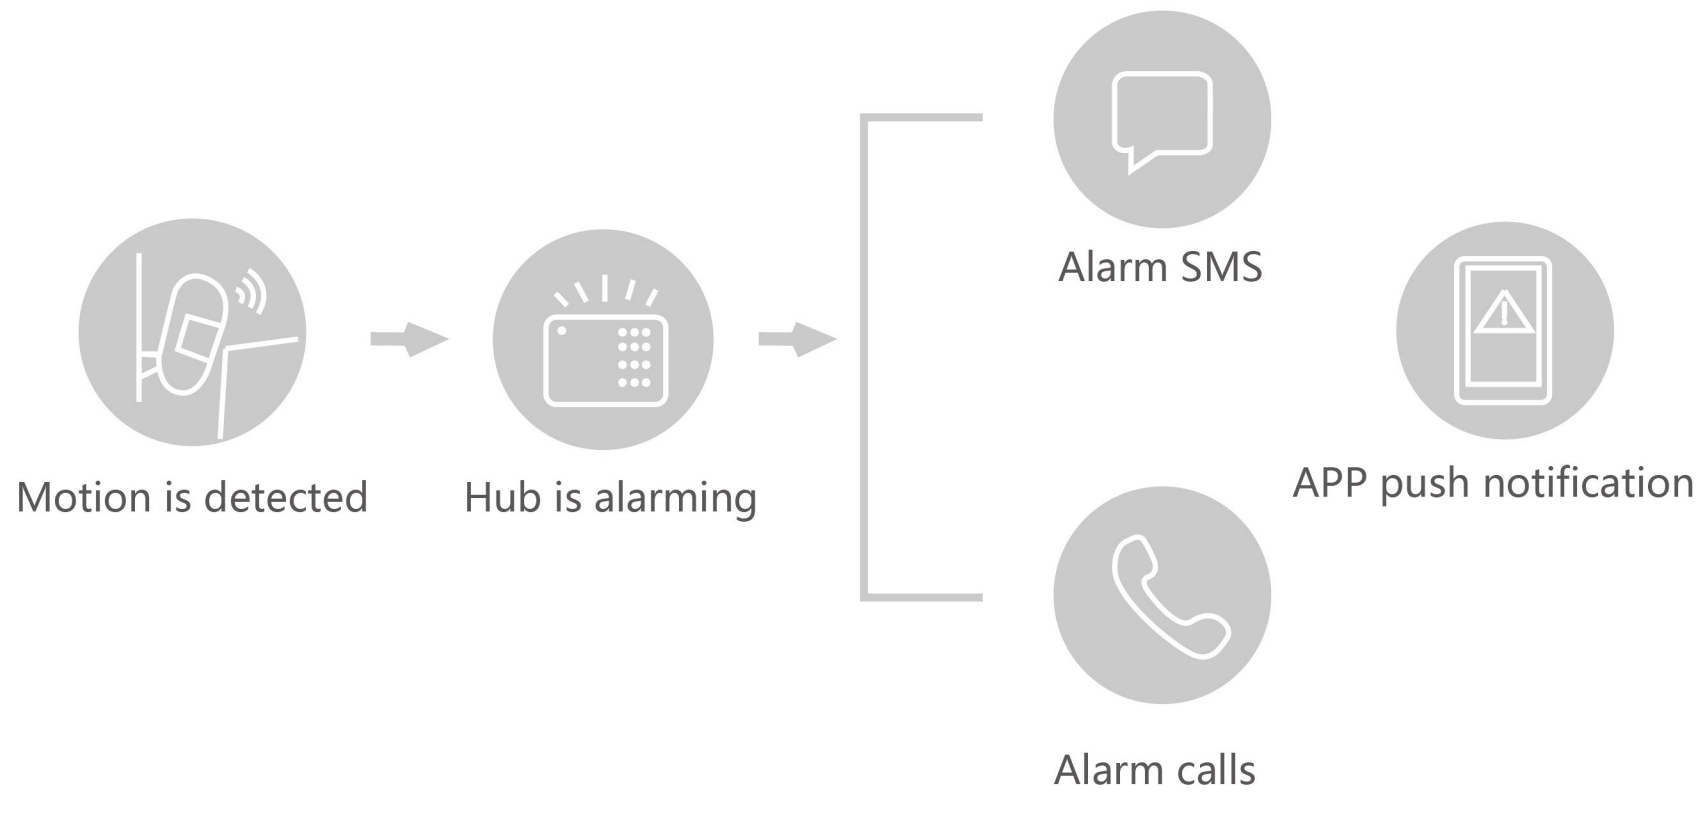

## Working together with alarm hub

They detect movement by intelligently sensing heat emissions from anyone moving across a room. When any movement is detected, the sensor will send alert signal to the alarm hub, then alarm calls & SMS, APP alert notification will be sent to your mobile phone.

## How to work

## Nothing Escapes Its Eyes

120° wide angle detection, with a wide horizontal coverage range of 12m

## Detects Intruders, Not Pet

It is pet friendly for most pets weighing under 15 kg. Avoid false alarm caused by pets, let your little cutie swim at home

## Keep Your Room Safe

These wireless sensors are easily installed with wall mount adhesives, so put it in the corner where anyone passes by.

### Indoor security

Use a wireless connection

Low power consumption with battery power
