

Wireless Siren with Strobe

tuya

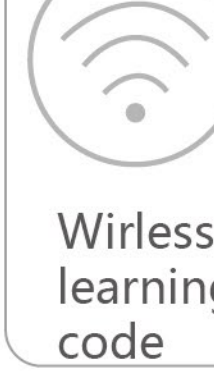

Compact design

Tiny body

High 110db

Wireless learning code

Beauty In Harmony

Stylish & compact structure appearance blends perfectly with the look of your home design

Applications

It can be found in places such as common homes, shops, warehouses, shopping malls, etc.

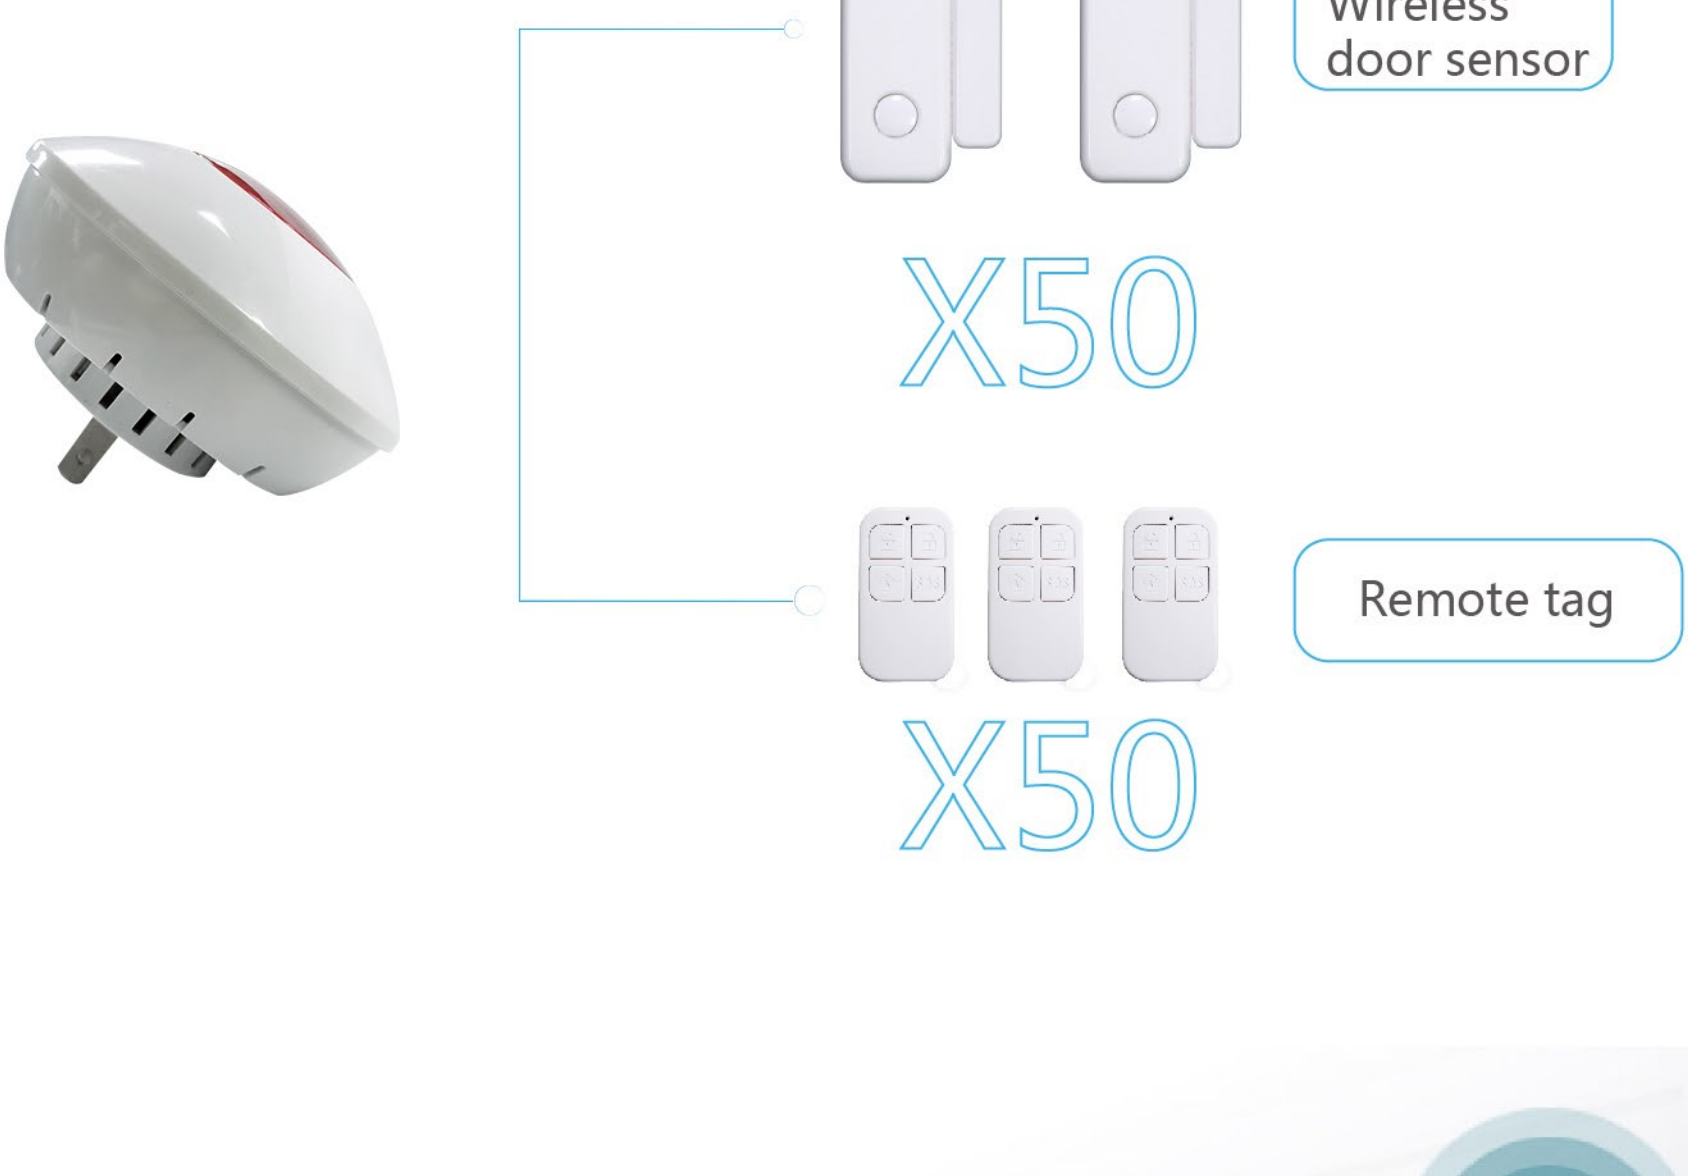

Tiny size, huge protection

The siren will immediately sound in loud 110db once any wireless detector is triggered, with the light is flashing to shock the illegal/would-be intruder

Wireless learning code

50pcs wireless detectors and remote tags can be added

At the same time, it also works together with other alarm hub as a wireless external device. When alarm is triggered, it will blink and sound in high db.

Multi-function use

As an alarm hub

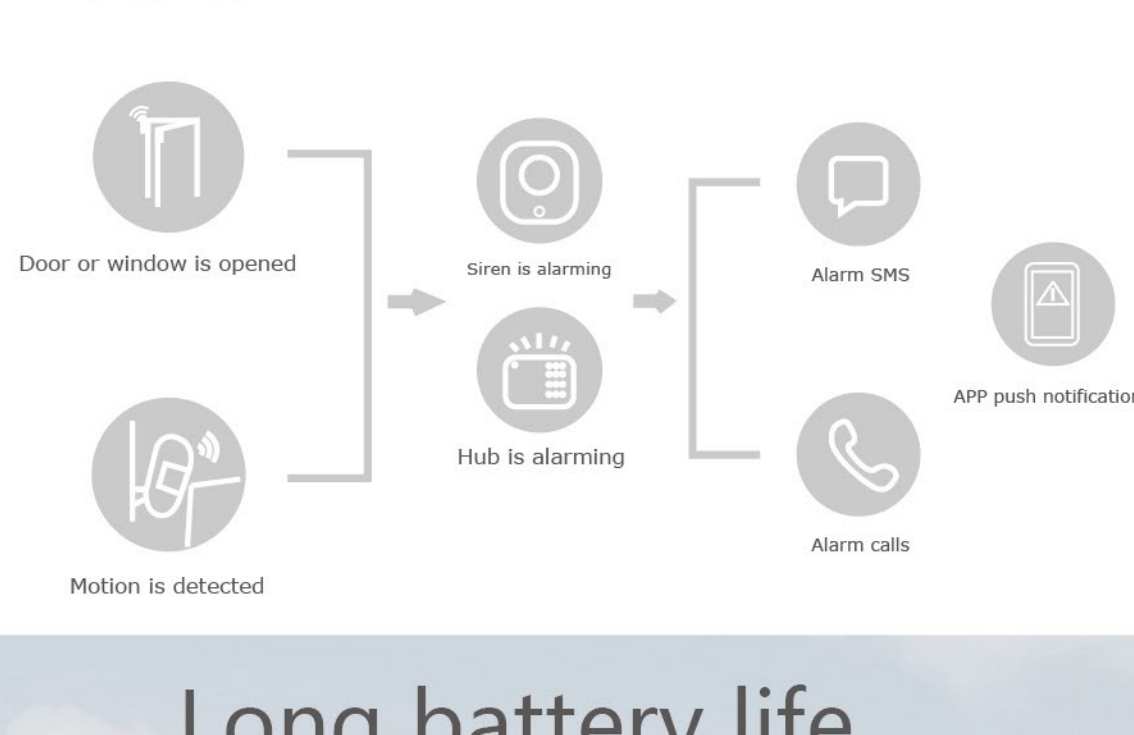

No alarm hub is needed, itself works as a standalone alarm hub to work together with infrared detector, door magnetic, remote control, etc

As a wireless siren

Working as a wireless siren to work together with an alarm hub.

Long battery life

The power of Built-in lithium battery can be more than 8 hours for standby
